NOTE GÉNÉRALE : Les données du tableau englobent parfois plusieurs espèces de bétail. Dans ce cas, on a généralement attribué les données globales à l’espèce qui paraissait être numériquement la plus importante. Ainsi, la rubrique des chevaux comprend parfois des ânes et des mulets, celle du bétail, des buffles, etc. On trouvera ci-dessous, pour quelques pays, les statistiques des buffles et des chameaux à fin 1928.

Nombre de têtes (en milliers).

**General Note:** Some of the figures given in the table cover several species of live-stock. Whenever the preponderant species is known, the collective figure is assigned to it. Thus the figures referring to horses may include mules and asses; those referring to cattle may include buffaloes, etc. Returns of buffaloes and camels in certain countries at the end of 1928 are given in the following statement:

**Number of Head (000's omitted).**

### Buffaloes.
