I.
Army.

A. SUPREME MILITARY AUTHORITY AND ITS ORGANS

The President of the Republic is Commander-in-Chief of the land and sea forces; in peace time he carries out this function through the Minister of War and the Minister of Marine and in war time may appoint an individual to discharge the duties of the supreme command.

The various duties of the War Office are allocated to different offices directly subordinate to the Minister of War, with the Secretariat of State as their central organ.

These consist of:

The Central Department.
The Department for Military Personnel.
The General Staff.
The Director of Engineer Services.
The Director of Ordnance.
The Medical Director.
The Director of Army Finance.
The Director of Army Intendance.
The Headquarters of the military districts and areas.
The Department of Military Justice.
The Promotion Commission.

The Secretariat of State consists of the Department of the Minister and the Department for Current Affairs.

THE GENERAL STAFF.

The General Staff is responsible for directing the General Staff services and working out arrangements for the preparation for war. It is responsible for directing army training.
The Chief of the General Staff is a divisional general with seniority over all other generals of the same rank. He is responsible for proposing to the Minister all measures which the war experience and technical progress may show to be necessary for the defence of the country, studying the reports submitted by the inspectors of the various arms and officers commanding higher units, examining the training curricula of the schools, directing army manoeuvres, laying down general directions for the schemes of mobilisation, co-ordinating the work of the various sections.

The Chief of the General Staff is assisted by two deputy-chiefs, each at the head of a department. The two deputy-chiefs are brigadier-generals. The General Staff also includes an independent section and certain auxiliary services. The First Department is divided into two sections: "intelligence" and "operations". The Intelligence section is sub-divided into two sub-sections: one for the American continent armies and the other for the armies of Europe and Asia.

The Second Department is also divided into two sections: "mobilisation" and "transport and statistics".

The Independent Section is responsible for research work connected with military history and geography; it also publishes the General Staff Bulletin.

The following are also subordinate to the General Staff: the Army Geographical Service, the Commission for the General Survey of Brazil, the Military Photographic and Printing Section.

COUNCIL OF NATIONAL DEFENCE.

The Council of National Defence is an advisory organ. It serves as a centre for intelligence and undertakes the study of financial, economic, military and moral questions which concern the defence of the country.

It is composed of:

(a) Permanent members:
1. The President of the Republic;
2. The Minister of War;
3. The Minister of Marine;
4. The Minister of Finance;
5. The Minister of Communications;
6. The Minister of Agriculture;
7. The Minister of the Interior;
8. The Minister for Foreign Affairs;
9. The Chief of the Staff of the Army;
10. The Chief of the Staff of the Navy.

(b) Occasional members:
Any other persons requested to attend by the President of the Republic.

ADMINISTRATION OF MILITARY LAW.

Military law is administered by the Military Courts in the twelve judicial circuits into which the country is divided and by the Supreme Military Court for the whole country.

B. CONSTITUTION OF THE ARMY

The Brazilian Army is divided into two main organisations:

(a) The first-line army, consisting of the active or regular army, the first-line reserve and auxiliary troops;
(b) The second-line army with the reserve.
The objects of the first-line army, which is intended to train men for service with the field armies, are, in co-operation with the navy, the defence of the country and the maintenance of the laws and federal republican form of government established by the Constitution.

The active or regular army, which is stationed in all parts of the country, forms a school for the military training of young men recruited by drawing lots among the annual contingents. The units of the active army constitute centres for the spread of national culture and a means of strengthening the bonds of national solidarity between the various federated States, which enjoy wide constitutional autonomy.

The Active or Regular Army consists of:

1. Officers on full pay of all the permanent establishments, and the personnel of the Auxiliary Services.
2. Aspirant officers.
3. Non-commissioned officers (sergeants, corporals and lance-corporals) and other personnel of equivalent grades.
4. The pupils in the Military Schools who are liable to mobilisation.
5. Soldiers (volunteers and men drawn by lot).

The first-line reserve, to which all men under 30 years of age who have undergone military training belong, supplies the effectives for the mobilisation of the active army.

The First-Line Reserve consists of:

1. Officers, aspirant officers and non-commissioned officers of the First-Line Reserve recruited as laid down in the various regulations.
2. Other citizens of 21 to 30 years of age (excepting those who are performing active service) and reservists of less than 21 years of age.

The auxiliary troops consist of contingents from the gendarmeries of the various Federal States and of the Federal District.

The object of the second-line army is to supply reinforcements for the first line, more particularly units for the lines of communication, fortress garrisons and men for the auxiliary services of the combatant forces.

The Second-Line Army consists of:

1. Officers and non-commissioned officers recruited under the various regulations.
2. Citizens of more than 30 and less than 37 years of age.

In war time, men under 21 or over 44 may be called up for service with the Second-Line Army.
The Second-Line Reserve consists of:

1. Non-commissioned officers recruited as laid down in the regulations.
2. Citizens of more than 37 and less than 44 years of age.

The transfer to the Second-Line Army of men who have completed their period of service in the First-Line Army, and transfers from the Second-Line Army to the Second-Line Reserve, take place in the year following that in which the men attain the ages of 30 and 37 years respectively, at the same time as the dismissal of the year-class which has completed its period of service in the Active Army.

The Second-Line Army is exempt from service in peace time, except for purposes of the census returns. It is not liable to mobilisation, except in the circumstances laid down in the constitution of the Republic. It is, nevertheless, liable to annual periods of training lasting from 4 to 6 weeks, and may be called up for that purpose at suitable times when the necessary authorisation has been given by the National Congress.

C. MILITARY DISTRICTS

Brazil is divided into eight districts and one military area, each consisting of one or more of the Federal States.

</tbody>
</table>

For the purposes of the incorporation of volunteers and youths drawn by lot, and of all other proceedings under the military service laws connected therewith, Brazil is divided into three military
zones. The first zone consists of the 1st, 2nd, 6th, 7th and 8th military districts and the military area; the second zone consists of the 4th district; and the third zone of the 3rd and 5th districts.

All Federal troops of the first and second lines in each district or area are subordinate to the officer commanding the division or detachment stationed in the district or area. The latter is responsible for recruiting in his district area. Each State, as also the Federal District, constitutes one military recruiting area, with the exception of the State of Minas Geraes, which is divided into two areas. The Federal Territory of Acre belongs to the recruiting area of Amazonas. The recruiting areas are sub-divided into census and recruiting districts, each of which consists of a single municipality. Every municipal district in the Federal District similarly constitutes a census and recruiting district.

D. HIGHER FORMATIONS

The Army is composed as follows:

(1) 5 Infantry Divisions, of which only 4 are organised.\(^1\)

The composition of an infantry division is as follows:

Divisional Headquarters: The Divisional General Commanding, the Divisional Staff, the Chiefs of Services and their assistants, escort to G.O.C.

Troops: Infantry: 2 brigades of 2 regiments each, 1 of which may be a regiment of 3 light infantry battalions.

Artillery: 1 brigade of 2 mounted artillery regiments, 1 heavy artillery regiment and 1 mountain artillery group.

Cavalry: 1 regiment.

Engineers: 1 battalion.

Air Force: 1 observation flight.

The personnel and departments of the various services.

(2) 3 Cavalry Divisions.

The composition of a Cavalry Division is as follows:

Divisional Headquarters: The Brigadier-General Commanding, the Divisional Staff, the Chiefs of Services and their assistants, escort to G.O.C.

Troops: Cavalry: 2 brigades of 2 regiments each.

Artillery: 2 horse artillery groups.

Infantry: 1 mounted infantry battalion.

Air Force: 1 observation flight.

The personnel and departments of the various services.

(3) 1 Mixed Brigade with the following composition:

Brigade Headquarters: The Brigadier-General Commanding, the Brigade Staff, the Chiefs of Services and their assistants, escort to G.O.C.

---

\(^1\) The troops of the 5th Infantry Division are divided among the 5th, 6th, 7th and 8th Districts.
Troops: 3 light infantry battalions.
2 independent cavalry regiments.
1 mixed artillery regiment.
1 engineer battalion.
1 mixed flight.

The personnel and departments of the various services.

(4) Coast-Defence Artillery District (on the coast of the 1st Area),
consisting of:

Coast-Defence Headquarters: The Brigadier-General Command-
ing, the District Staff and Chiefs of Services.

Troops: 2 groups of 3 batteries each and 8 independent batteries.

E. ARMS AND TECHNICAL ESTABLISHMENTS

1. Arms.

The following are the units in the different arms of the active army:

Infantry:

13 regiments of 3 battalions each.
29 light infantry battalions.
3 mounted infantry battalions.
2 army establishments guard companies.

In addition to the three battalions, each regiment also has a heavy
machine-gun company. Battalions are organised in four companies. At
present only the regiments in the 1st Division have three battalions.

Cavalry:

15 independent cavalry regiments of 4 squadrons each.
5 divisional cavalry regiments of 4 squadrons each.

Artillery:

(a) Field-artillery:

10 mounted artillery regiments consisting of 3 groups
of 3 batteries each.
5 heavy artillery regiments of 3 groups (divisional
artillery).
3 heavy artillery regiments of 4 groups (army artillery).
1 mixed artillery regiment (1 mounted group, 1 field
group and 1 mountain group).
5 mountain artillery groups of 2 batteries.
6 horse-artillery groups of 2 batteries.

(b) Coast-defence artillery: 2 groups of 3 batteries,
3 groups of 2 batteries and 8 independent
batteries.

1 According to the Military Year-Book (Almanak Militar) of the Brazilian War Office
for 1925, two light infantry battalions, the third battalions of ten infantry regiments
and an Army establishments guard company are organised as skeleton units without
effectives; three mounted infantry battalions and the headquarters of two brigades
have not yet been organised. The fourth companies of the various battalions are only
organised in war time upon general mobilisation.

2 Three independent regiments are without effectives.

3 The following have not yet been embodied: one mounted artillery regiment, three
heavy artillery regiments of four groups, three horse-artillery groups, two mountain
artillery groups, the third groups of the mounted artillery regiments, the second and
third groups of the heavy artillery regiments and the two brigade headquarters.
Engineers: 6 battalions: 5 of 3 companies each and 1 of 4 companies.
  1 railway battalion.
  1 railway company.
  1 aviation company (flying school).
  3 signals squadrons. 1

Special troops, the officers of which are drawn from all arms:
  12 air force flights.
  1 tank company.

The Navy has a naval regiment composed of 2 infantry battalions (with 8 companies and 2 machine-gun Platoons), one field artillery group (with 3 batteries), one workmen company, one engineers company and one mixed company. The budgetary effective for 1930 have been fixed at 1,510 men (1,497 in 1929).

2. Technical Establishments.

The following are the principal technical establishments:
The Arsenal, Rio de Janeiro and Rio Grande do Sul;
The Cartridge and Military Pyrotechnical Factory, Rio de Janeiro;
The Black Powder Factory, Estrella (State of Rio de Janeiro);
The Chemical Powders and Explosives Factory, Piquete (State of São Paulo).

F. RECRUITING SYSTEM

I. GENERAL PRINCIPLES.

Every Brazilian above the age of 21 is liable to military service for the defence of the country and its constitution. The requisite effectives are recruited by voluntary enlistment, without bonus and, if this does not supply the required number, by compulsory service based on the drawing of lots.

Although compulsory service was introduced under the Federal Constitution of 1891, no regulations in this respect were issued prior to the law of January 4th, 1908. The latter law again was not put into effect until 1916, when lots were drawn for the contingent for the following year. The law of January 4th, 1908, then underwent certain amendments, which do not, however, affect its substance; the regulations established under it were supplemented in 1920.

Every citizen must apply for inscription in the rolls in the first ten months, or, in the case of a man living in the first district, in the first four months of the year in which he completes twenty years of age. He may also apply for inscription upon reaching seventeen years. The annual contingent for incorporation consists of all young men over twenty years of age inscribed in the rolls who are selected by lot. Should the number of the latter be insufficient, lots are drawn again amongst the contingent which was not called up from the preceding year.

1 The three signals squadrons and the mounted field engineers company belonging to one of the battalions have not yet been organised. Two battalions are merely skeleton units.
Service in the Active Army.

The period of service in the Active Army is as follows:

(a) From 1 to 2 years training for volunteers and youths drawn by lot — the period varying according to the arm and the orders issued each year by the War Ministry.

(b) Periods of 2 to 3 years for enlisted and re-enlisted men.

(c) A period of one year for volunteers and youths drawn by lot who report themselves in advance to the unit, of whatever arm, to which they are assigned, at any time before the day laid down for their incorporation, provided that they have acquired the requisite proficiency by the end of the year.

(d) Periods of 4, 6 or 16 months' intensive training for volunteers.

(e) A period of 5 years for volunteers who are aspirants for the rank of sergeant in the different schools, or for specialists' certificates in the Air Force or Tank Corps.

Service in the First-Line Reserve.

The reservists of the First-Line Army are divided into the following categories:

The first category consists of youths who have been released from service in the Active Army (including the Military School) and sent on furlough.

The second category consists of men who have received military training.

The third category consists of men of 21 to 30 years of age who are neither included in the above categories nor incorporated in the Active Army or auxiliary forces, no matter whether or not they are borne on the muster-rolls.

Reservists are liable for training as follows:

Men belonging to the first or second categories may be called up on two occasions for manoeuvres, or larger tactical exercises, for periods not exceeding 4 weeks each, namely, for one such period before they attain the age of 25 and for a second period while they are between 25 and 30 years of age. Those under 25 years of age must further report once a month, during two years only, at a musketry range, and go through a musketry course.

Men belonging to the third category have to attend these musketry courses for 5 years; they must further undergo military training in the special reservists' schools, which the Government will organise in certain units, or will form from detachments from these units, under conditions to be laid down hereafter, and they must present themselves, when required to do so, for the training.

Service in the gendarmeries of the Federal District and States of the Union is reckoned as army service.
Re-engagements.

Men who have completed their period of service may, provided that they have a good civil and military character, and are under 28 years of age, re-engage for periods exceeding 2 years in the arm to which they belong, up to the following numbers:

(a) Sergeants or corporals of all arms, up to the total establishment of these ranks in their respective corps.

(b) Lance-corporals or soldiers, volunteers or conscripts, up to 12 per company, squadron or battery (including 6 drivers in field and mountain and tank batteries), and up to 16 per company in the engineers. (These figures may be varied at the instance of the General Staff of the army.)

(c) Buglers, trumpeters, drummers, bandsmen; personnel of the Intendance, and Ordnance Store Corps, Medical Corps and Veterinary Services, telegraphists and artificers up to the total establishments of these grades in their respective corps.

2. Men debarred from service.

The following are debarred from service in the army: (a) before incorporation: men sentenced to forfeiture of civil rights; men sentenced for crimes against the independence or territorial integrity of the country; men sentenced for a degrading offence; (b) after incorporation: men coming under one of the foregoing headings; men sentenced to more than two years' imprisonment; deserters who have completed their sentence.

3. Exemptions.

The following are exempted from military service in peace and war: men passed physically unfit; men appealing on religious grounds, subject, however, to approval by the Minister of War. In the latter case, a man granted exemption loses all rights and privileges as a Brazilian citizen.

The following are exempted from service in the active army in peace time:

(a) Only sons of widows, unmarried mothers, wives divorced from or deserted by their husbands who are the sole support of their families;

(b) Sons of disabled fathers supported by them;

(c) Husbands of disabled women;

(d) Eldest brothers of families without father or mother who support a minor brother, sister or disabled grandfather or grandmother unable to support themselves.

G. Cadres

(i) N.C.O.s.

The non-commissioned cadres consist of sergeants and corporals. The following are the grades of sergeant: sergeant-major and first, second and third sergeants.

Appointment to non-commissioned rank is made as follows: Corporals are selected by competitive examination from men of the rank and file who are liable for service on mobilisation. Promotion to sergeant is by competitive examination among corporals in each unit. Candidates who qualify are appointed third sergeant. Third sergeants in the infantry may also be appointed from the Sergeants' School for that arm. Promotion among N.C.O.s from the rank of third sergeant up to and including that of warrant officer is also by competitive examination among candidates holding the rank immediately junior.
(2) Officers.

The establishment of officers is divided into three main categories: combatant officers, medical officers and departmental officers.

The combatant officers in the various arms are commissioned from the Military School at Realengo (Federal District). On leaving the School, pupils are appointed officer-cadets and are posted to the various units. Officer-cadets are promoted second lieutenant in accordance with the place obtained by them in the Military School final examinations.

Medical officers include doctors, chemists and veterinary surgeons. Doctors and chemists are commissioned by competitive examination among civilian doctors and chemists who have obtained the degree of a medical faculty. Veterinary officers are appointed from the Veterinary School.

The departmental officers are allocated to one of the following three corps: army intendance, administration and accountancy.

The army intendance officers are supplied from the Higher Intendance School. Entrance to the school is by competitive examination reserved for combatant army officers or officers in one of the services.

Administrative officers and accountants are drawn from two special schools. Entrance to these schools is by competitive examination, which may be taken by sergeants belonging to army units. The foregoing officers cannot be promoted above the rank of captain.

Officers on the Army General Staff are drawn from officers in the various arms who have taken the staff college course. After serving five years on the General Staff, these officers revert to their unit, with which they must serve for not less than a year.

TRAINING ESTABLISHMENTS.

Military education consists of:

I. Primary training:

(a) Elementary, given to soldiers in the regimental schools;

(b) Elementary and professional, aiming at providing the ordinary units and services of the army with specialists, and at gradually replacing civilian employees in the factories and arsenals by soldiers belonging to the artificers' companies. This training is given in the companies or platoons of military apprentices for a period of five years, beginning at the age of 17 in the ordinary units and service formations; it is also given to men volunteering for this training;

(c) Supplementary and professional, given in the sergeants' schools in the case of infantry, field artillery and engineering sergeants; in the cavalry schools, in the case of sergeants of this arm; in the aviation school in the case of sergeants of this arm and motor mechanics; in the communications courses, in the case of telegraphists, radio-telegraphists and radio-telephonists; in the various schools attached to the veterinary school, and in the Coastal Artillery Training Centre (to be created) in the case of sergeants of this arm.

II. Secondary training:

(a) College, in the military colleges;
(b) Professional, in the preparatory course of the Military School intended for civilians and soldiers who are candidates for the Military School, and for sergeants who are candidates for the course for officers in the army administration.

III. Advanced training.

The Realengo Military School, Rio de Janeiro, is intended for the training of officers of the various arms. The period of studies is three years. The first two years are employed in general military training and the last in specialised training for each arm. Candidates for entrance to the School must be in possession of the higher educational certificate, have performed six months' service in an army unit and have passed a competitive examination in mathematics. Pupils from the military colleges are admitted *ipso jure* to the Military School.

Training at the Staff School, Rio de Janeiro, is divided into two courses: (1) the staff course in the strict sense of the term, lasting three years; officers with the rank of lieutenant and captain who are candidates for the General Staff may enter by competitive examination; (2) a refresher course lasting one year for field officers and, in exceptional cases, captains.

The Officers' Advanced School is intended for infantry, artillery and engineering officers. There are two courses, one for subalterns and the other for officers of higher rank.

The Military Flying School, Rio de Janeiro, gives the necessary training to air pilots, observers, mechanics and expert artificers. It has a flying unit company attached to it.

The Higher Schools of Intendance and Administration, which work in collaboration at Rio de Janeiro, have for their object the training of army intendance, administrative and accountancy officers.

The Army Veterinary School, Rio de Janeiro, gives courses lasting three years, consisting of the requisite theoretical and technical training for army veterinary personnel. The School also gives a course for farriers.

The Infantry Sergeants' School is attended by corporals, men and civilians who have passed a competitive examination. The course lasts six months.

The Cavalry School for officers of this arm.

The Coastal Artillery Training Centre for specialists of this arm.

The Communications Training Centre under the Telegraphic Service for the instruction of specialists in this branch of engineering.

The Military Geographical Institute for the training of geographical engineers and of the staff of the Geographical Service.

The Military Engineering School for the training of engineer officers.

The Advanced Veterinary Service School.

The Military Colleges, of which there are three, at Rio de Janeiro, Porto Alegre, and Fortaleza are intended to give secondary education to boys who propose to enter the military or naval schools. The courses given in these schools last six years. Education is given free to orphans who are the sons of soldiers.

The object of the Army Musketry Directorate, which is under the direction of a senior infantry officer, is to direct, organise on uniform lines and superintend the military training given in the rifle clubs, secondary and higher educational establishments and other institutions for training reservists. The commission acts as intermediary between the above-mentioned institutions and the army.

The practical course affords training for army doctors and pharmacists.

The provisional chemical course is intended to train officers employed in the manufacture of powder and explosives.

The provisional cavalry school provides advanced training for officers.
The army medical practical school holds two courses, viz: a training course for candidates for the medical corps; and an advanced course for officers serving in that corps.

The naval school holds an elementary course (2 years) for boys from 14 to 16 and an advanced course (5 years) for boys from 16 to 18. The school's object is to train boys desiring to become naval officers. It is under the direct authority of the Minister of Marine.

The school for submarines and submarine weapons.

An engine-room course has also been instituted to give advanced training to specialist officers.

Navy.

NOTA. — The first date in brackets gives the date of the launching of the ship; the second that of its completion. The dash (—) signifies that the construction has not yet been completed or that the date of completion is not known.

LIST OF UNITS

(1928 and 1929)

Battleships:

2. São Paulo (1909-1910)

1 Not including 200 aspirant officers and 1,530 (1,666 for 1929 and 1,880 for 1930) officers on the reserve list, and 1,005 pupils in various military schools.

2 Large refit in 1917-1919.
Cruisers:

1. Bahia $^1$ (1909-1910) Normal displacement, 3,150 tons. Length, 401 $\frac{1}{2}$ feet. Beam, 39 feet. Mean draught, 13 feet 7 $\frac{1}{2}$ ins. Guns: 10 4.7-inch; 4 3-inch; 4 3-pdr. 4 torpedo-tubes (18-inch) above water.

2. Rio Grande do Sul $^1$ (1909-1910) Beam, 39 feet. Mean draught, 13 feet 7 $\frac{1}{2}$ ins.

3. Barroso $^2$ (1896-) Displacement, 3,450 tons. Dimensions, $330 \times 43 \frac{3}{4} \times 16 \frac{5}{8}$ feet. H. P. 7,500 = 20.5 kts. Guns: 6 6-inch; 4 4.7-inch; 4 4.7-inch.

Coast-Defence Vessel:

Floriano $^3$ (1899-) Displacement, 3,162 tons. Length, 267 $\frac{1}{2}$ feet. Beam, 48 feet. Max. draught, 13 $\frac{1}{4}$ feet. H. P. 3,400 = 15 kts. Guns: 2 9.4-inch; 4 4.7-inch.

Destroyers $^4$:

1. Maranhão (1913) Displacement, 934 tons. Dimensions, $265 \frac{1}{4} \times 26 \frac{1}{2} \times 9 \frac{1}{4}$ (minimum). Guns: 3 4-inch. Tubes, 4 21-inch.

2. Amazonas (1908)
3. Matto Grosso (1908)
4. Piauí (1908)
5. Pará (1908)
7. Paráhyba (1909)
8. Alagoas (1909)
9. Santa Catharina (1909)
10. Parana (1910)
11. Sergipe (1910)

Displacement, 560 tons. Dimensions, $240 \times 23 \frac{1}{2} \times 7 \frac{5}{8}$ feet. Guns: 2 4-inch; 4 3-pdr., 2 18-inch tubes.

4 submarines:

1. F. 5 (1913-14 $^5$) Displacement, $\frac{250}{350}$ tons. Dimensions, $150 \times 13.8 \times 9.8$ to

2. F. 3 (1913-14 $^5$) 12 feet draught. 2 tubes (18-inch). Speeds: $13 \frac{1}{2}$ kts. $8.8 \frac{1}{2}$

3. F. 1 (1913-14 $^5$)

4. Humayta (1927 $^6$) Displacement: $\frac{1,450}{1,884}$ tons. Dimensions: $284 \frac{1}{2} \times 25 \frac{1}{2} \times 14$ feet. H. P. 4,920 = 18.5 kts. 6 tubes (21-inch).

Miscellaneous: 9 different units. (Submarine-carrier, training-ship, river craft, etc.)

$^1$ Completely refitted 1925-26.
$^2$ Refitted 1916-17.
$^3$ Refitted 1924-25.
$^4$ The date in brackets gives the date of the launching of the ship.
$^5$ Date of launching.
$^6$ Date of completion.
$^7$ For 1928: 1,930 tons.

</tbody>
</table>

1 The depreciated tonnage is calculated as follows:
   
   (1) For battleships, battle-cruisers, coast-defence ships, monitors, aircraft-carriers and miscellaneous craft, a reduction in original tonnage at the rate of 1/20 per annum from date of completion.
   
   (2) For cruisers and light cruisers, a reduction of 1/17 per annum from date of completion.
   
   (3) For torpedo-craft and submarines, a reduction of 1/12 per annum from date of completion.

2 Depreciated tonnage on January 1st, 1929.
3 Depreciated tonnage on January 1st, 1930.
4 Only sloops, despatch vessels and gunboats.

Budget Expenditure on National Defence.

A. Notes on Budget Procedure.

1. The financial year coincides with the calendar year.
2. The budget shows gross figures, i.e., receipts collected by the various departments in the course of their administration are accounted for on the revenue side of the budget.
3. The budget is given partly in gold, partly in paper milreis.
4. In addition to the appropriations for the various departments, the budget contained, until 1927, a number of special credit authorisations.
5. If for any reason the budget is not voted in time, the previous estimates remain in force. Thus the expenditure estimates for 1925 were adopted for 1926.
6. The expenditure on defence is shown under the chapters, Ministry of War and Ministry of the Marine.
B. BUDGET EXPENDITURE ON NATIONAL DEFENCE.

I. Summary of Defence Expenditure.

<table>
<thead>
<tr>
<th></th>
<th>1926</th>
<th>1927</th>
<th>1928</th>
<th>1929</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Gold milreis</td>
<td>Paper milreis</td>
<td>Gold milreis</td>
<td>Paper milreis</td>
</tr>
<tr>
<td>Ministry of War</td>
<td>331 237,976</td>
<td>100 194,331</td>
<td>200 269,425</td>
<td>200 275,227</td>
</tr>
<tr>
<td>Ministry of the Marine</td>
<td>873 118,220</td>
<td>1,400 144,818</td>
<td>1,450 149,020</td>
<td></td>
</tr>
<tr>
<td>Total</td>
<td>1,204 356,196</td>
<td>1,500 308,458</td>
<td>1,600 414,243</td>
<td>1,650 424,247</td>
</tr>
<tr>
<td>Total in paper milreis</td>
<td>360,771</td>
<td>315,358</td>
<td>421,603</td>
<td>431,837</td>
</tr>
</tbody>
</table>

Note. — 1. These figures include appropriations for non-effective services (pensions), but not service of debt.
2. The conversion of gold into paper milreis has been made at the average rate of the year 1926, and at par for 1927, 1928 and 1929:
   Average 1926: 1 gold milreis = 3.8 paper milreis.
   Par for January 1927, 1928 and 1929: 1 gold milreis = 4.6 paper milreis.

II. Analysis of Defence Expenditure.

1. The following table shows the main items of expenditure charged to the Ministry of War:

<table>

</tbody>
</table>

1 Not available.

Notes. — (a) The budget of the Navy includes certain minor appropriations of a civil character as, for instance, harbourmasters' offices.

(b) Aviation expenditure is distributed over various naval appropriations.
III. Expenditure on Non-effective Services.

The appropriations for non-effective services are estimated at:

<table>
